Contents

Introduction

Sources

A typical slide

- ▶ Start with an introduction
- ▶ Use `itemize` or `enumerate` to organize your main points
- ▶ Refer to sources with [1]
- ▶ Write inline equations like this: $E = mc^2$

Example

Rather than freely writing text in the frame, the use of blocks (such as this) is recommended. Here you can find a short introduction to the basics of beamer:

1. <https://www.overleaf.com/learn/latex/beamer>

Sources I

- [1] D. E. Knuth, *The T_EXbook*. Addison-Wesley, 1984.
